

Lab-7

Name: Prince Kumawat

ID: 2000030824

Section: 11

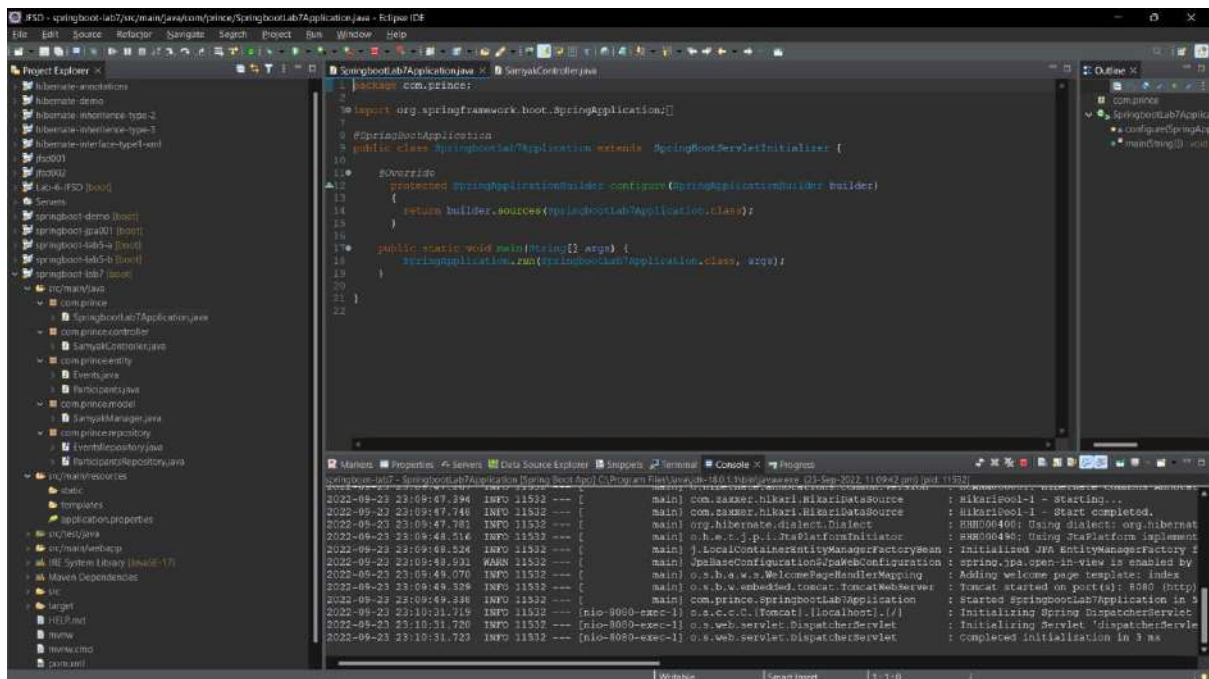

The screenshot shows the Eclipse IDE with the 'application.properties' file open. The file contains the following configuration:

```
spring.mvc.view.prefix: /
spring.mvc.view.suffix: .jsp

# Configuration for MySQL Database
spring.jpa.hibernate.ddl-auto=create
spring.datasource.driver-class-name=com.mysql.cj.jdbc.Driver
spring.datasource.url=jdbc:mysql://localhost:3306/kku
spring.datasource.username=root
spring.datasource.password=1105
spring.jpa.show-sql=true
```

The Project Explorer on the left shows the project structure, including the 'src/main/java' directory with the 'com.prince' package and the 'SpringBootLab7Application.java' file.

The screenshot shows the Eclipse IDE with the 'SpringBootLab7Application.java' file open. The code is as follows:

```
package com.prince;

import org.springframework.boot.SpringApplication;
import org.springframework.boot.autoconfigure.SpringBootApplication;

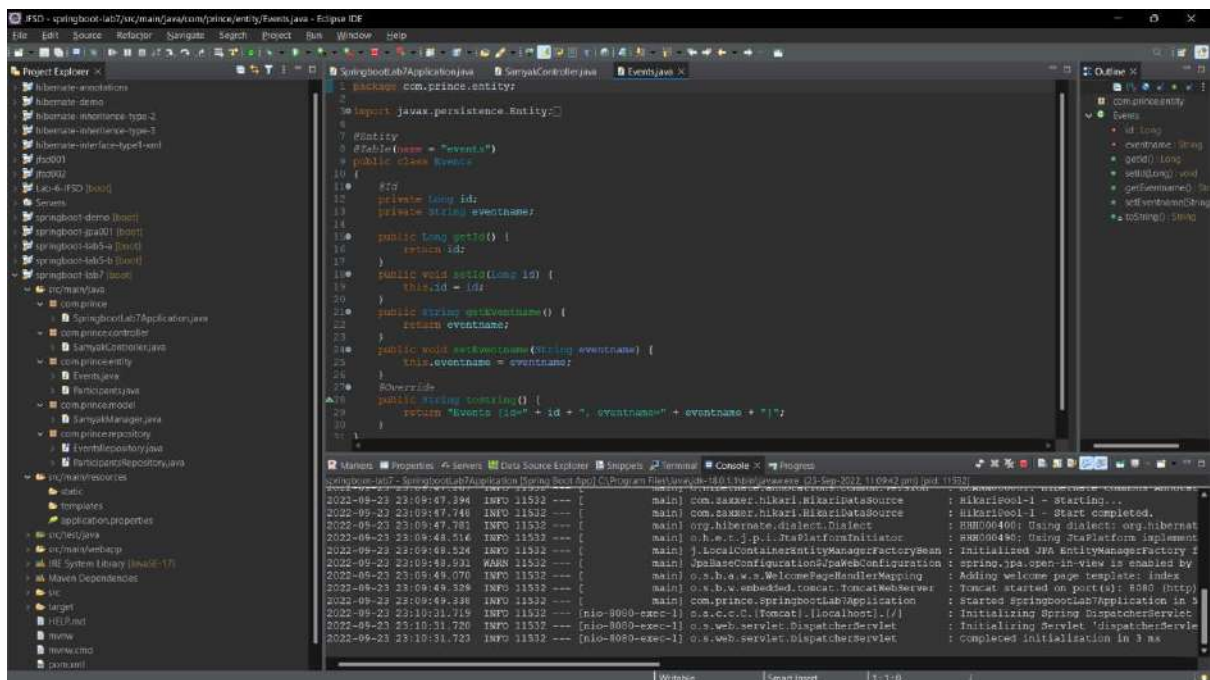

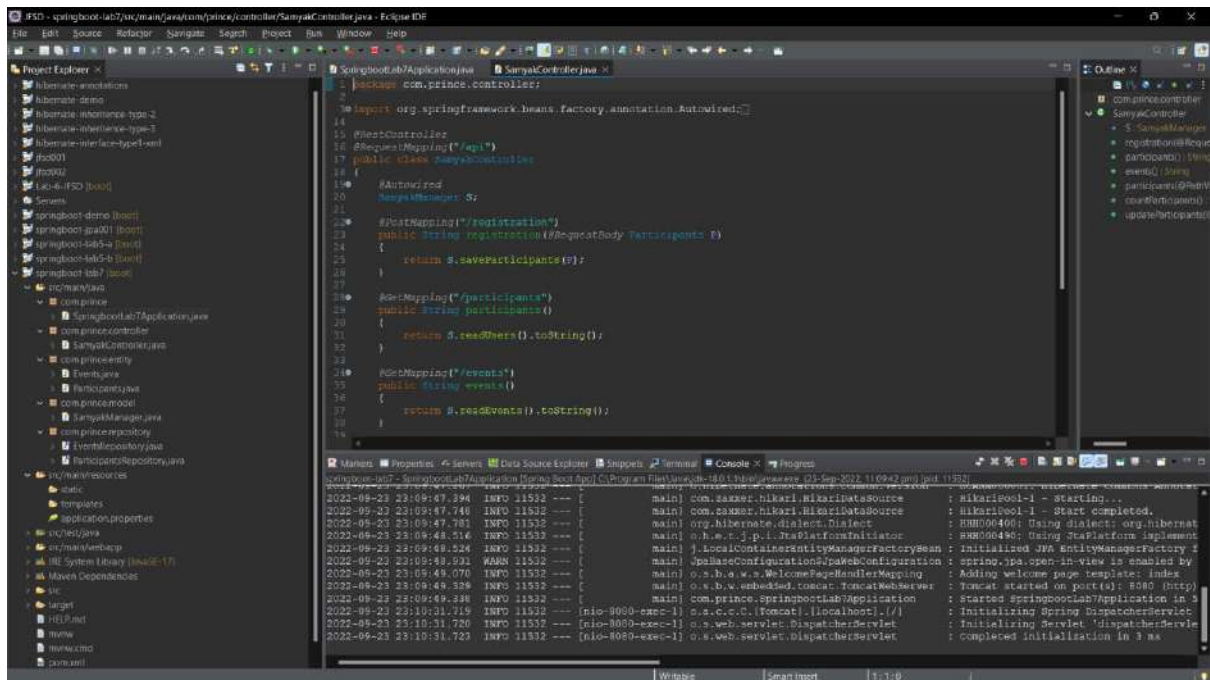

@SpringBootApplication
public class SpringBootLab7Application extends SpringBootServletInitializer {

    // Override
    @Override
    protected SpringApplicationBuilder configure(SpringApplicationBuilder builder) {
        return builder.sources(SpringBootLab7Application.class);
    }

    public static void main(String[] args) {
        SpringApplication.run(SpringBootLab7Application.class, args);
    }
}
```

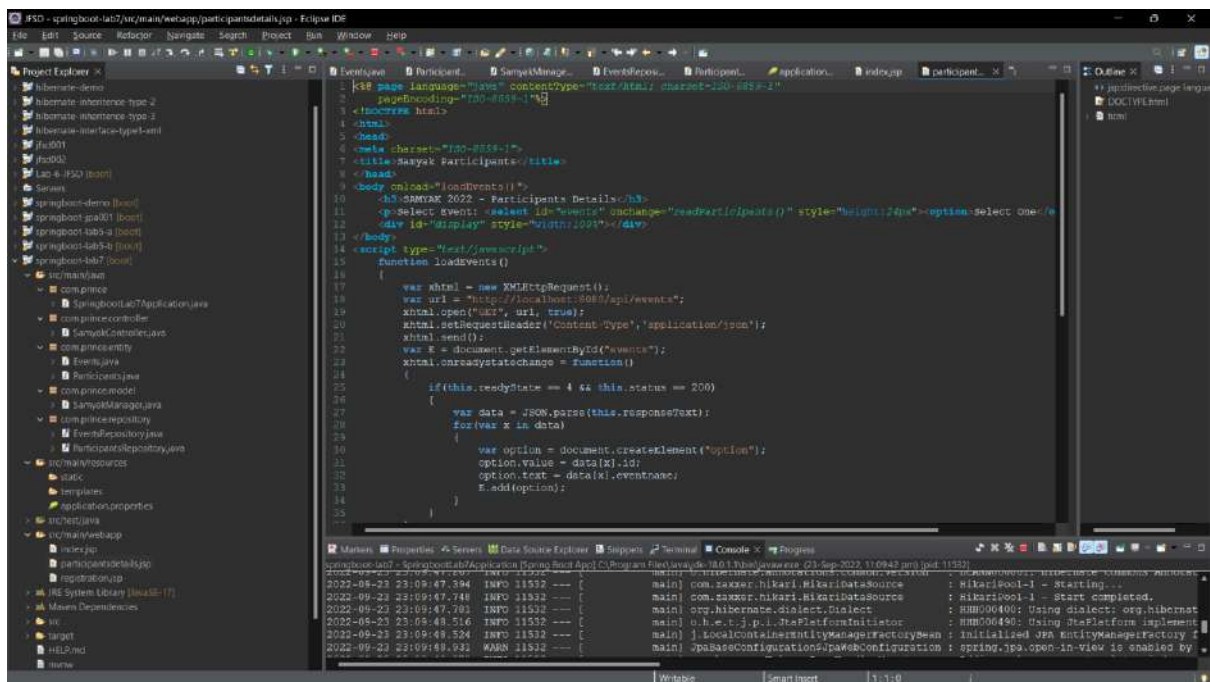

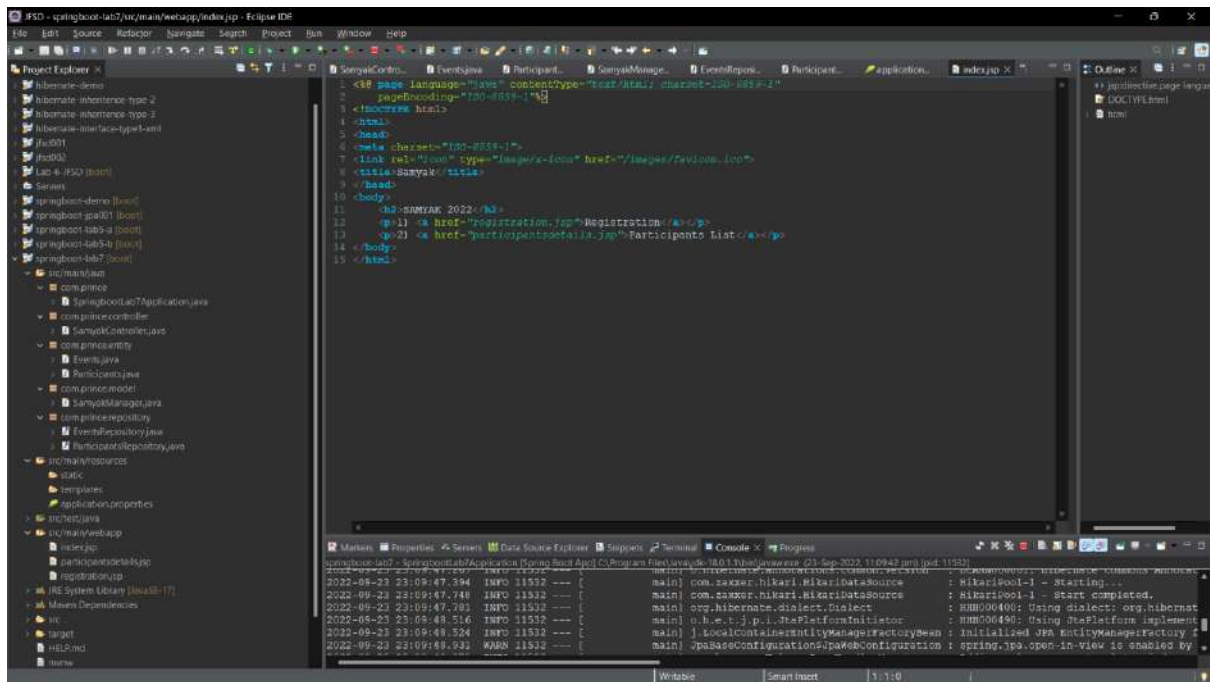

The console output at the bottom shows the application starting successfully:

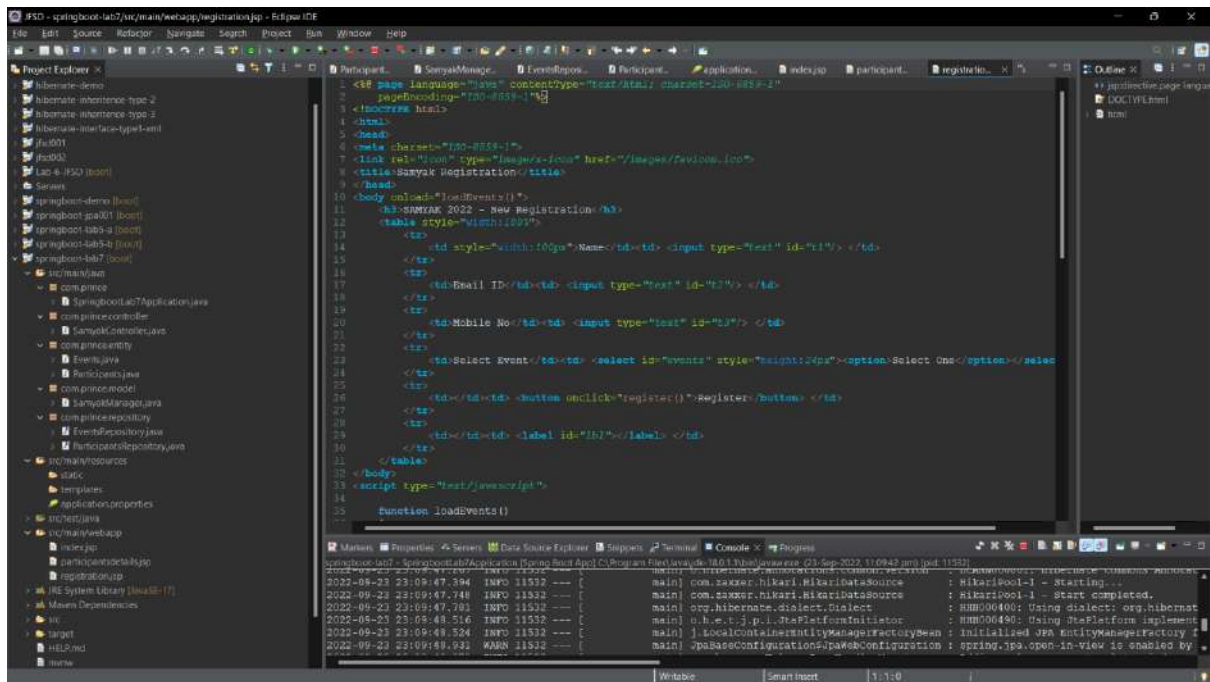

```
2022-09-23 23:09:47.394 INFO 11532 --- [main] com.zaxxer.hikari.HikariDataSource : HikariPool-1 - Starting...
2022-09-23 23:09:47.748 INFO 11532 --- [main] com.zaxxer.hikari.HikariDataSource : HikariPool-1 - Start completed.
